WAJIHA GUL

Artificial Intelligence Undergraduate | Aspiring AI Engineer
Peshawar, Pakistan | +92 3482059691 | 20pwele5276@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate at the University of Engineering and Technology, Peshawar, with practical experience in Python programming, Machine Learning, Natural Language Processing, data analysis, and LLM-integrated applications. Completed four virtual internship programs and developed independent AI projects involving electrical fault diagnosis, agricultural decision support, document-based question answering, and interactive learning applications. Interested in building practical AI solutions and strengthening skills in AI engineering and applied Machine Learning.

EDUCATION

Bachelor of Science in Artificial Intelligence, University of Engineering and Technology (UET), Peshawar
2024–2028 | Expected Graduation: 2028

TECHNICAL SKILLS

- **Programming:** Python, C++, SQL
- **Machine Learning:** Scikit-learn, Supervised Learning, Classification, Regression, Random Forest, Model Evaluation
- **AI & NLP:** Natural Language Processing, LLM APIs, Prompt Engineering, Retrieval-Augmented Generation (RAG), Transformers
- **Data Analysis:** NumPy, Pandas, Matplotlib, Data Preprocessing, Exploratory Data Analysis
- **AI Tools & Libraries:** FAISS, Sentence Transformers, Whisper, Groq API, Joblib
- **Development & Testing:** Streamlit, SQLite, Pytest, Git, GitHub
- **Development Environments:** Jupyter Notebook, Google Colab, VS Code
- **Operating Systems:** Linux Ubuntu, Windows

PROFESSIONAL EXPERIENCE (VIRTUAL INTERNSHIPS)

AI/ML Engineering Intern | DevelopersHub Corporation
2026 | Virtual Internship
- Worked on practical Machine Learning assignments involving classification, regression, and data analysis.
- Applied Python for data preprocessing, exploratory analysis, model training, and evaluation.
- Used Git and GitHub to manage and submit project work.

Artificial Intelligence Intern | CodeAlpha
2026 | Virtual Internship
- Completed practical AI tasks involving language translation, FAQ chatbots, and object detection.
- Gained experience with Python, API integration, and AI application development.

Python Programming Intern | Oasis Infobyte
2026 | Virtual Internship
- Developed Python applications involving automation, utility tools, and interactive applications.
- Practised programming fundamentals, application logic, and API integration.

Machine Learning Intern | Prodigy InfoTech
2026 | Virtual Internship
- Worked on Machine Learning tasks involving regression, classification, customer segmentation, and computer vision.
- Applied Python libraries for model development and evaluation.

INDEPENDENT PROJECTS

1. GridGuard AI | Electrical Equipment Monitoring & Document Assistant
Python, Streamlit, Pandas, FAISS, Sentence Transformers, Groq API
- Developed a tool to analyse electrical measurement data from CSV and Excel files.
- Implemented document-based question answering for equipment manuals using retrieval techniques.
- Added visualizations, unusual-pattern checks, and downloadable reports.

2. AI Crop Health & Agricultural Decision Support System
Python, Scikit-learn, Random Forest, Whisper, Groq API, Streamlit
- Built a Machine Learning model to classify five crop-health conditions using soil and environmental measurements.
- Integrated voice input and AI-generated explanations for model predictions.
- Achieved approximately 97.5% test accuracy on the project's generated dataset.

3. AI Electrical Fault Diagnosis System
Python, Pandas, Scikit-learn, Random Forest, Groq API, Streamlit

- Developed a classification system to identify possible electrical faults using voltage, current, frequency, power factor, and temperature readings.
- Integrated AI-generated explanations and suggested inspection checks.
- Achieved 95% test accuracy on the project's dataset.

4. ResearchGuard AI | Research Paper Analysis System
Python, RAG, FAISS, Semantic Search, LLMs

- Developed an AI-based research assistant for searching and analysing research literature.
- Used semantic retrieval and document-based question answering to help locate relevant evidence in research papers.

5. Linux Practice Lab | Interactive Linux Learning Platform
Python, Streamlit, Groq API, JSON

- Built an interactive platform with Linux command challenges, quizzes, and exam practice.
- Integrated an AI tutor and progress-tracking features.

CERTIFICATIONS

- **AWS Cloud Foundations**, Amazon Web Services, 2026
- **Data Science Job Simulation**, British Airways via Forage, 2026
- **Prompt Engineering & Working with LLMs**, Microsoft Learn Student Ambassadors, UET Peshawar, 2026
- **Deloitte Data Analytics Virtual Experience Program**, Deloitte via Forage, 2026
- **EY Technology Risk Job Simulation**, EY via Forage, 2026

TRAINING & WORKSHOPS

Prompt Engineering & Working with LLMs Workshop
